CBD

"Inuvet products are the number one choice at our vet practice. Especially Calmin. Why? Because we have had such incredibly good results when treating our patients with it."

Lina Simons,
Khelladi Small Animal Practice

CBD oil (with cannabidiol and L-tryptophan).

Calmin 5% CBD isolate

Oil with CBD (Cannabidiol) and L-Tryptophan.

Calmin is a mono-CBD-nurturing oil with L-Tryptophan. As a solubilisate, Calmin has a high bioavailability: Once the solubilisate comes into contact with water, the highly concentrated dissolved ingredients are enclosed in fine vehicles - a micro-emulsion is formed. In this form, the ingredients can be more quickly and effectively absorbed by the body and Calmin can thus be dosed much more efficiently.

| Product type |
|--|
| Care product for cats and dogs. |
| Contents |
| 2/5/10ml oil |
| Composition |
| MCT oil, CBD (5%) isolated from commercial hemp, L-tryptophan (2.5%) |
| Note |
| Do not use immediately before and after general anesthesia, during pregnancy or during lactation. |
| For use in cats and dogs over 6 months old. |
| Keep out of the reach of children. |
| Free from terpenes and phenols. |
| Free from THC. |
| To ensure that the Calmin bottle remains securely sealed, please follow these instructions: After each use, clean the rim of the bottle with a dry, dust-free cloth to remove oil residue, keep the bottle upright and do not shake. |
| Do not rinse or wash any part of the pipette with water. |
| Made in Germany. |
| Allergens |
| Not known. |

 Free from THC

Ingredients (excerpt)

CBD

CBD, in contrast to THC (tetrahydrocannabinol), has no psychoactive effect. To ensure that Calmin does not contain THC, we use a special purified commercial distillate. It is made with an alcoholic distillation process that selectively extracts CBD and eliminates THC. The final product does not contain any alcohol, since it completely evaporates during the production process.

L-tryptophan

L-tryptophan is an amino acid and a precursor to the happiness hormone serotonin.
