

NEW

Vesica Powder contains no added flavorings and is suitable for animals suffering from allergies.

Vesica

For the support of the bladder and the urinary tract.

Only available at your veterinary practice

"Ever since the very first application 9 years ago, we have been fans of Vesica, using it with conviction."

**Fredi Koll,
Niedernberg Veterinary
Practice for Small Animals**

"We are extremely enthusiastic about Vesica and offer it to all pet owners. We are always happy when an owner opts for treatment with Vesica."

Vesica

For the support of the bladder and the urinary tract.

Vesica promotes long-term physiological function of the uroepithelium, ensures urinary tract perfusion and protects the bladder wall against adhering germs by supporting defense mechanisms. Vesica in powder form is easy to mix with the feed and administer, making it ideal for dogs that refuse tablets. Moreover, Vesica powder does not contain any added flavorings, is suitable for dogs suffering from allergies and can be given over a long period of time.

Ingredients (excerpt)

Cranberry extract (*Vaccinium vitis-idaea*)

Cranberries contain vitamins, minerals and nutritionally valuable secondary plant substances (flavonoids).

D-mannose

D-mannose is a sugar that is often used for bladder irritations as it supports the body's defense against invading and already present pathogens.

Dandelion extract (*Taraxacum officinale*)

Dandelions and dandelion roots in particular have a diuretic effect. The sesquiterpenolactone and the high level of potassium contained in the plant are likely responsible for this effect.

Nettle extract (*Urtica dioica folium*)

Nettle leaves have diuretic properties thanks to which the urinary tract is thoroughly flushed.
