

"Inuvet has terrific and exciting products that are extremely well-accepted by animals. After all, even best medicine is useless unless it's accepted by the patients."

Susanne Schmid, veterinarian

No kidding with the kidneys!

Only available at your veterinary practice

Renax

For the natural support of kidney function in cats.

Renax

For the natural support of kidney function in cats.

Renax binds kidney-damaging phosphates and toxins in the intestines. It also supports both kidney and liver functionality.

Ingredients (excerpt)

Calcium carbonate

Calcium carbonate binds phosphate in the intestine, reducing absorption and thus promoting kidney function.

Inulin

Inulin acidifies the intestinal pulp, thereby decreasing ammonia absorption. This reduces the amount of ammonia that needs to be converted to urea and thereby alleviating the kidneys' workload.

Cordyceps sinensis ground

The beneficial mushroom Cordyceps sinensis strengthens and fortifies the kidneys and can thus act to support kidney function. A special manufacturing process improves the absorption of the nutrients it contains: Through the so-called shell-broken process, the mushroom is finely ground during production to break down the cell walls,

priming the ingredients for improved absorption.

Reishi ground

The beneficial reishi mushroom can support and strengthen kidney function. Reishi also has a positive effect on liver function. The shell-broken method is used here as well.

Vitamin C

Vitamin C has two functions: On one hand, as an antioxidant, it protects against free radicals. On the other hand, supplementing with vitamin C increases the bioavailability of the beneficial mushrooms used, which helps to improve kidney function.

Ginkgo extract (*Ginkgo biloba*)

Ginkgo can support and improve the blood flow. In addition to its high antioxidant effect, it also helps support natural kidney function.

Artichoke extract (*Cynara scolymus*)

Artichoke components are said to stimulate cell metabolism and thus promote regeneration and repair processes.

Milk Thistle extract (*Silybum marianum*)

The fruit of the milk thistle has a positive, supportive effect on the liver, as well for the kidneys.

Vitamin E

Vitamin E is an antioxidant that can protect against free radicals. Free radicals can damage tissues and reduce metabolic processes. Vitamin E helps to trap some of the free radicals, thus protecting the tissues and preserving metabolic processes.

Renax tablets

Product type

Complementary feed for cats

Contents

120 / 225 × 1g divisible tablets

Composition

Milk and dairy products, processed animal protein, inulin, yeast, Cordyceps sinensis (ground), reishi (ground), calcium carbonate, minerals, eggs and egg products, fish and fish by-products

Analytical components

Crude protein (26.0%), crude ash (10.3%), crude fiber (2.3%), crude fat (10.6%)

Sensory additives (per kg)

Milk thistle extract (52,500mg), artichokes extract (26,250mg), ginkgo extract (5,250mg)

Nutritional additives (per kg)

Vitamin C (5,000mg), vitamin E (2,500mg)

Daily-recommended dosage

	1 × a day
< 2,5kg	1
2,5–5kg	2
> 5kg	3

approx. 1g ± 1 × (level measuring spoon)

Renax can be given directly or mixed with the pet's food.

Shelf life and expiration information

Do not store over 25°C.

Use within 6 months after opening.

Store the container tightly closed in a dry location.

Note

Do not use in case of obstruction of the bile ducts.

Monitor potassium levels, especially if ACE inhibitors are used concurrently.

Made in Germany.

Renax powder

Product type

Complementary feed for cats

Net quantity

60g powder

Composition

Inulin, Cordyceps sinensis (ground), reishi (ground), calcium carbonate

Analytical components

Crude protein (5.4%), crude ash (6.4%), crude fiber (2.1%), crude fat (1.8%)

Sensory additives (per kg)

Milk thistle extract (131,500mg), artichokes extract (65,500mg), ginkgo extract (13,160mg)

Nutritional additives (per kg)

Vitamin C (12,500mg), vitamin E (6,250mg)

Daily-recommended dosage

	1 × a day
< 2,5kg	2
2,5–5kg	3
> 5kg	4

approx. 1g ± 1 × (level measuring spoon)

Renax can be given directly or mixed with the pet's food.

Shelf life and expiration information

Do not store over 21°C.

Use within 6 months after opening.

After opening, remove the powder promptly and close the container tightly.

Store the container tightly closed in a dry location.

Note

Do not use in case of obstruction of the bile ducts.

Monitor potassium levels, especially if ACE inhibitors are used concurrently.

Suitable for animals suffering from allergies.

Free from animal ingredients.

Do not inhale powder dust.

The filling level is predefined for technical reasons.

Made in Germany.
