

BLOATED?

"Since the products are so well received by our patients, we have been working with Inuvet products for many years."

**Michael Kluge, veterinarian,
practice for small and exotic animals**

**Only available at your
veterinary practice**

Kolax

To support natural
gastrointestinal activity.

Kolax

To support natural gastrointestinal activity.

The liquid complex of essential oils promotes the activity of the digestive tract and supports food pulp transportation through the stomach and intestines. Kolax keeps the digestive system balanced and can also be given after anesthesia to stimulate gastric and intestinal activity.

Product type

Supplementary feed for rats, hamsters, rabbits, dogs, horses.

Net quantity

30 / 100 / 300ml oil complex

Composition

Cold pressed linseed oil, essential oils (anise, caraway, fennel, cinnamon bark, chamomile, lemongrass, angelica root)

Analytical components

Raw ash ($\leq 0.1\%$), raw fiber ($\leq 0.1\%$), raw fat (99.9%), calcium ($\leq 0.1\%$), magnesium ($\leq 0.1\%$), sodium ($\leq 0.1\%$), phosphorus ($\leq 0.1\%$)

Instructions

Use the enclosed syringe to administer the specified amount. To do so, (1) attach syringe to the bottle, (2) turn the bottle upside down to fill the syringe, (3) return the bottle to an upright position and remove the syringe, (4) wipe the opening of the bottle with a dry cloth before closing.

You can administer Kolax directly into the mouth or mix it with food.

In urgent cases, repeat after 1/2–2 hours.

Provide the animal with sufficient water.

Daily recommended dosage

 0-2kg	0,5ml
> 2kg	1ml
	
0-2kg	0,5ml
2-20kg	1ml
20-30kg	2ml
30-40kg	2,5ml
+ 10kg	+ 0,5ml
	
< 80kg	1ml + 1ml/20kg
80-200kg	5ml
> 200kg: + 100kg	+ 5ml

Feed up to 3 times a day in the specified amount.
