Laxin

Single feed material for cats and dogs.
Supports digestion, excretion of the
feces and their ammonia excretion.
Laxin also regulates the consistency
of feces.

Only available at your
veterinary practice

Laxin

Supports the defecation process

Supports digestion, excretion of the feces and their ammonia excretion. Laxin also regulates the consistency of the feces.

Laxin aids digestion and detoxification by osmotically increasing water retention in the intestine, which helps to prevent constipation. In addition, it promotes the elimination of toxins through bowel movements by lowering the pH in the colon and shortening intestinal transit time. Laxin is available in powder form, making it easy to mix into your pet's food and carry with you when traveling.

Product type

Single feed material for cats and dogs

Net quantity

60 / 170g powder

Composition

Lactulose

Analytical components

Crude protein (< 0.3%), crude ash (< 0.4%), crude fiber (< 0.5%), crude fat (< 0.3%), moisture (3.9%)

Instructions

Measure the specified amount of powder with the measuring spoon and mix with the specified amount of water. Draw up the mixture with the enclosed syringe. Laxin can be fed directly or mixed into your pet's feed.

Leftover suspension can be either discarded or stored in the refrigerator and fed the following day.

In case of diarrhea, discontinue feeding and reinstate administration with a lower dosage.

Ensure adequate fluid intake.

Daily recommended dosage

	Amount of water	1 x a day
1kg	0,75ml	+ 0,5 x 
2-3kg	2,25ml	+ 1 x 
4-7kg	4,5ml	+ 2 x 
8-11kg	6,75ml	+ 3 x 
12-14kg	9ml	+ 4 x 
15-18kg	11,25 ml	+ 5 x 
19-22kg	13,5ml	+ 6 x 
23-26kg	15,75ml	+ 7 x 
27-30kg	18ml	+ 8 x 
31-33kg	20,25ml	+ 9 x 
34-37kg	22,5ml	+ 10 x 
38-40kg	24,75ml	+ 11 x 

approx. 1,5g  (level dosing spoon)

Shelf life and expiration information

Do not store over 25°C.

Use within 6 months after opening.

After opening, remove the powder promptly and close the container tightly.

Store the container tightly closed in a dry location.

Note

Do not use in cases of gastrointestinal obstruction, intestinal perforation or risk of intestinal perforation.

The filling level is predefined for technical reasons.

Made in Germany.

Ingredients

Lactulose

Lactulose is a disaccharide that is broken down by bacteria in the intestine. This breakdown process causes a laxative reaction. Lactulose can thereby aid defecation by increasing the flow of water into the intestines. This increases the fecal volume, which in turn can stimulate intestinal peristalsis. This may support, improve, and facilitate fecal excretion. In addition, the increased intestinal water absorption helps reduce the retention time of toxins in the intestines and reduce the absorption of harmful substances into the body. Lactulose can also lead to a decrease in intestinal pH, which helps increase the excretion of ammonia.
